Professional Summary

Computer Science student with experience in backend development, API design, and secure web systems. Skilled in Python, FastAPI, Django, and REST APIs. Passionate about building scalable backend services and solving real-world problems through efficient software systems.

Technical Skills

- **Languages:** Python, JavaScript, Java
- **Frameworks:** FastAPI, Django, MERN Stack
- **Tools:** Git, Postman, Linux, MySQL
- **Concepts:** REST APIs, Authentication, Secure API Design

Research and projects

University Assessment and Marking Automation system (UAMAS)- Dedan Kimathi University of Technology(DeKuT)

- Built backend services to automate assessment generation and grading.
- Integrated GPT API and OCR to process text and scanned submissions.
- Designed system to support automated feedback generation for students.

KaziLink – USSD Job Platform

- Developed backend services using Python and FastAPI.
- Integrated Africa's Talking API for USSD communication.

- Designed system architecture focused on scalability and security.

ElimuTuts – MERN Education Platform

- Built student and tutor dashboards using MERN stack.
- Implemented secure login and access control.
- Collaborated using GitHub for version control.

Professional Experience

Tana Water Works Development Agency *Computer Scientist Attachee (Feb 2025 – Apr 2025)*

- Supported ICT infrastructure and networking
- Contributed to ERP system enhancement with a focus on secure data handling

Power Learn Project Academy *Volunteer-Mentor, Tutor (Jul 2025 – Mar 2026)*

- Mentored learners in project development and secure coding practices
- Participated in workshops on ethical and secure tech development

Education

Dedan Kimathi University of Technology **Bachelor of Science in Computer Science (Sept 2022 – Dec 2025)**

Relevant Coursework: Cryptography, Networking, Machine Learning, Data Structures & Algorithms, Web Development, Entrepreneurship, Ethics in professionalism, Artificial Intelligence

CESI: Masters in Computer Science (Feb 2026 - June 2026)

Relevant course work: Internet of Things(IoT) , Research projects, AI and Data Science

Certifications

- CCNA 1 Networking | PortSwigger Web Security | Postman API Fundamentals | CyberTalents Linux Basics | Power Learn Project Software Development

Languages

- Fluent in English, French and Swahili
